PROJECT SPECIFICATION & ARCHITECTURE DOCUMENT

1. INTRODUCTION & EXECUTIVE SUMMARY

1.1 Purpose: This Software Requirements Specification (SRS) document defines the structural, functional, and design specifications for the official website of **BDMH**. The platform merges two major divisions—**BDMH Digital Solutions** (business agency services) and **BDMH Academy** (skills training)—under a unified brand and visual identity.

1.2 Brand Positioning: BDMH operates as a dual-division digital solutions and skills development brand in Cameroon, selling verifiable outcomes rather than abstract skills. The platform maintains a professional Dark-Mode Modern Tech / Digital Agency UI aesthetic.

2. OVERALL DESCRIPTION & ARCHITECTURE

2.1 Dual-Division Architecture:

- **BDMH Digital Solutions:** Targets business owners seeking online growth through Web Development, SEO, and Paid Advertising. Primary CTA: *Get a Quote*.
- **BDMH Academy:** Targets students, beginners, and professionals seeking practical digital skills across structured learning tracks. Primary CTA: *Explore Training*.

2.2 Visual Identity & UI Guidelines:

- **Theme:** Dark-Mode Modern Tech Agency UI using Deep Midnight Navy (`#0B1329`) and Dark Slate (`#1E293B`) backgrounds.
- **Accents:** Electric Lime (`#8CE700`) for high-impact CTA buttons, active states, and focal badges.
- **Typography:** Clean sans-serif typeface (Inter / Helvetica Neue) with strong visual hierarchy and generous whitespace.

3. INFORMATION ARCHITECTURE & SITEMAPS

3.1 Global Navigation: `Home` | `Services` | `Academy` | `Portfolio` | `About` | `Contact` with a standout header button (*Get a Quote*) and mobile accessibility for both conversion paths.

File Name	Page Title / Role	Primary Content & Objectives
`index.html`	Home (Conversion Hub)	Hero value prop, Goal Selector cards, Featured Work, Training Preview, Trust/Testimonials, Final CTA.
`services.html`	Services Overview	Overview of Web Dev, SEO, and Paid Ads packages focusing on business outcomes and solutions.
`web-development.html`	Web Development	Detailed breakdown of business sites, e-commerce, maintenance, and conversion forms.
`seo.html`	Search Engine Optimization	Technical SEO, keyword research, local optimization, and performance reporting.

`paid-advertising.html`	Paid Advertising	Meta, TikTok, Snapchat, and YouTube ad campaign strategy and management.
`academy.html`	BDMH Academy	Learning tracks (Web Dev, Digital Marketing, SEO, Paid Ads), formats, schedules, and pricing.
`portfolio.html`	Portfolio & Case Studies	Verified website projects, campaign examples, challenge-solution-result metrics.
`about.html`	About BDMH	Brand story, mission, dual-sided ecosystem model (Learn, Apply, Grow), and team background.
`contact.html`	Contact & Enquiries	Project enquiry form, WhatsApp integration buttons, physical location details.

4. SPECIFIC REQUIREMENTS & FUNCTIONAL INTERACTIONS

4.1 Responsive Navigation

Mobile-optimized navigation menu that opens/closes smoothly, supports keyboard navigation, and automatically collapses upon link selection. Designed deliberately for small viewports without shrinking desktop layouts.

4.2 WhatsApp Integration

Prominent floating WhatsApp button formatted with international syntax (`+237 693 697 097`). Integrated with context-specific prefilled messages depending on entry points (Website inquiry, Marketing services, Training enrollment).

4.3 Project Enquiry & Conversion Forms

Standardized lead capture capturing Name, Business Name, Contact info, Selected Service, Optional Budget Range, and Project Description. Features server-side validation, spam protection, and clear post-submission feedback.

4.4 SEO & Analytics Foundation

Implementation of descriptive page titles, semantic HTML5 headings, image alt tags, robots.txt, sitemap.xml, and Google Search Console configuration. Conversion tracking for form submissions and WhatsApp clicks.

5. DEVELOPMENT & PHASED ROADMAP

Phase 1 - Planning & Content: Finalize service packages, copy, brand assets, and portfolio artifacts.
Phase 2 - Shared Layout & Homepage: Build CSS design system, responsive grid, header/footer, and conversion homepage.
Phase 3 - Conversion Pages: Build services, academy, portfolio, about, and contact pages.
Phase 4 - Connect & Test: Integrate forms, test WhatsApp links, verify mobile responsiveness, and configure SEO tools.
Phase 5 - Launch & Optimize: Publish live site, review user behavior, and iterate.
